THE SOFTWARE THAT CONTROLS YOUR SHIPMENTS

Inspired by You...

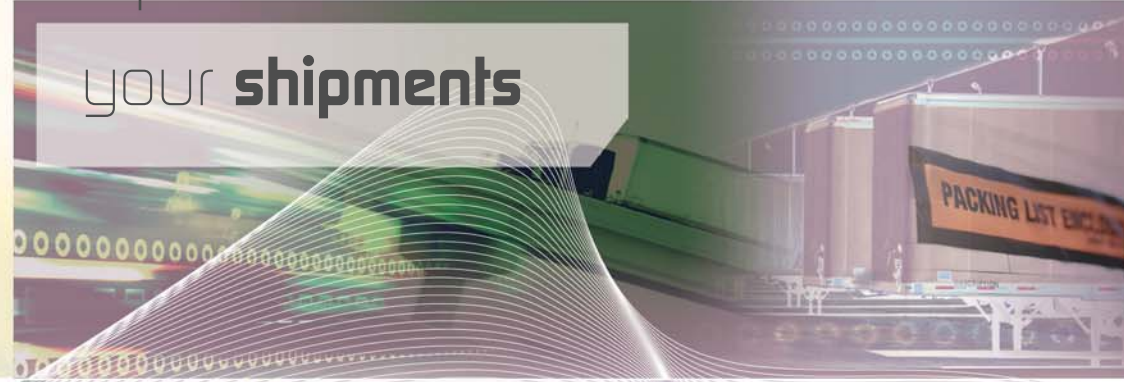

Created for You!

Optimize your shipments

"EXpedito, an operational asset"

Your business requires daily shipments domestically or abroad:

- Between 50 and thousands of shipments per day.
- With one or several carriers.
- From one or several sites (warehouses, offices).
- For one or several ordering parties (subsidiaries, businesses).

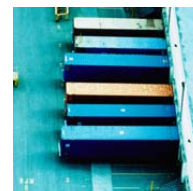

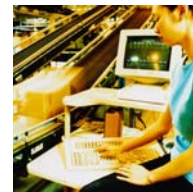

And you want to:

- **Optimize** the efficiency of your shipment plan
- **Control** your transportation budget
- **Monitor** the status of your deliveries

For you, we imagined EXpedito

➔ **A unique and effective software tool adapted to your organization to help you monitor your shipments.**

EXpedito : The software that can manage all your carriers.

A unique solution for all your carriers

- Save space in your shipment department
- Train users on a single software tool
- Have a global view of your shipping network

Manual or automatic design of your shipments

- Save time and improve cost efficiency
- Have a total interfacing with your information system

Edition of individualized carrier label

- EXpedito has integrated the specifications of the 40 biggest carriers in France and worldwide
- Carriers no longer need to relabel your packages

Control of truck loading

- Check the package loading process by bar code scanning
- Edit summary reports by carrier
- Send EDI transmissions to carriers

"With EXpedito, all your shipments are on the path to success."

Control

"EXpedito, an effective asset for your business."

your transportation budget

Anticipate, choose, act, EXpedito enables you to choose the right carrier at the right time.

Choice of the carrier

- By comparing the cost and/or the service level of each service provider
- Assisted and/or automatic choice

Grouping together the shipments for each consignee

- Optimize the transportation cost per deal

Calculation of the shipping fees charged to the clients

- According to the client (carriage free threshold)
- Permanent control of the "transportation cost on sale" ratio

Control of the transportation budget

- With visual dynamic indicators
- With customizable statistical reports

Tariff simulation for new carriers

- Estimate the benefits obtained for each proposal

Monitor

"EXpedito, a quality reference for your clients."

the status of your deliveries

Easy and quick control of all your shipments
With one and only one software.

Shipping notices

- Inform your clients by e-mail, fax or sms message that their order has been shipped

Accurate control of your shipments (no longer wait to be informed by your clients of a delay in delivery)

- Automatically receive delivery status from the carriers every hour
- Print immediate notices of delivery faults

Evaluation of the service rate

- Check the respect of delivery times
- Control the performance rate of your carriers

Control of the carriers' invoice

- With EXpedito, the control of the carrier's invoice will only take you a few minutes

Edition of various analysis reports on your activity

- Design your exports according to your parameters
